Biology

A. Objectives
1. Help students to acquire knowledge and understanding of biological principles and concepts.
2. Help students to develop an interest in study of biological science, an appreciation of the wonders of the living world and a respect for all living things.
3. Help students to develop an inquiring mind, the skills and attitudes for scientific investigation, and the ability to apply biological knowledge to solve problems, and to communicate effectively with others using scientific language.
4. Help students to develop a good learning habit and learn from assessments.
5. Fine-tune the existing NSS curriculum in biology.

B. Major Concerns for this school year (2011-2012)
1. To be in line with the school’s areas of concern
   1.1 equip teachers with the concept of all-round Christian education and foster students to lead a meaningful, targeted, wholesome and healthy life
   1.2 make the best use of NSS system; enhance the effectiveness in teaching and learning
   1.3 strengthen the effectiveness in teaching and learning English

2. To be line with the learning theme of the school:
   Seek the Truth, Plan your Future, Love others as you Love yourself
3. To be in line with the department's areas concern
   3.1 guiding students into taking up their responsibilities in their studies. Focus would be placed on students should develop and maintain self-access learning
   3.2 Increase student's learning experience through experiments and activities. (Help students to develop and sustain an attitude of curiosity to investigate and explore).
   3.3 Provide biological knowledge and understanding to develop positive values and attitudes towards life.
