An Overview of Other Learning Experience (New Senior Secondary Curriculum)

(1) **Belief**

To meet the challenges in the 21st century, it is necessary for the school to provide all-rounded learning experience for students, and foster them to be multi-intelligent. We believe that this kind of beneficial experience does not affect the learning in formal curriculum. Instead, students can find enjoyment in them, widen their horizons, extend personal strengths, learn to collaborate and communicate with other people.

(2) **Objective**

It is through other learning experience that students can be developed in a balanced way. This does not only help to enhance their confidence and self-esteem, but also explore their potential and enrich life experience. It is to cultivate them to be virtuous, responsible and willing to serve the others.

(3) **Rationale**

When formulating the policy, we uphold its uniqueness and build on our strengths. We start by evaluating the existing work of different units and departments as well as identifying our merits, followed by enhancement in particular areas. (It is to avoid large-scale interference with the existing system.) Finally, a six-year systematic and progressive blueprint has been accomplished.

(4) **Implementation**

a. Include co-curricular activities in school timetable. All teachers and students need to participate in these activities. (When appropriate, we would consider extending the activities outdoors or apply for venues of external organizations.)

b. Incorporate visual art or music appreciation into NSS curriculum so as to widen students’ art experience.

c. The arrangement of Other Learning Experience in school timetable is as follows:

<table>
<thead>
<tr>
<th>NSS Year 1</th>
<th>NSS Year 2</th>
<th>NSS Year 2</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Spiritual, Moral &amp; Civic Education</strong></td>
<td></td>

An Overview of Liberal Studies (New Senior Secondary Curriculum)

(1) Objectives

We prepare for the senior NSS curriculum by:

a. identifying the gist of the senior curriculum;

b. equipping the to-be-teachers

c. developing the curriculum of individual forms

d. facilitating favourable teaching environment in campus

e. strengthening value teaching

f. cultivating students for effective learning

(2) Policy Implementation

a. Facilitate fellow teachers’ understanding of the core contents and development of the subject

b. Schedule teacher trainings for teachers.

c. In order to uphold student performance in examinations and familiarize teachers with the curriculum, we suggest offering an extra AS module and incorporate AS co-teaching.

d. Recruit teachers who are interested in the subject development to join the teaching team.

e. Invite teachers who are going to teach junior forms next year to take part in coordination and experimentation in the junior forms.

f. Keep close contact with the Curriculum Planning Committee, which keeps track of the upcoming development and staffing of different subjects, so as to recruit suitable teachers for this subject.

g. Require experienced AS teachers (existing S6 and S7 teachers of LS) to teach certain part of the junior curriculum for the sake for experience sharing.

h. Build up external subject-based network and invite veteran consultants to develop the subject.

i. Set up a resource bank and develop resources in various aspects.
(1) **Objectives**

a. Lay down the foundation of learning LS for junior students.

b. Explore effective teaching modes of LS.

c. Prepare for senior forms and provide trainings to teachers.

In order to achieve the above-mentioned objectives, our curriculum should address the existing school situation. Before formulating the curriculum, we need to grasp understanding of three crucial elements of LS (ABC):

a. Enhance students’ awareness of current affairs (Awareness);

b. Broad students’ knowledge foundation and views of perception (Broadening);

c. Sharpen students’ critical skills (Critical thinking skills).

Besides, we cannot overlook the following basic concepts:

a. the relationship between knowledge foundation and scaffolding

b. the change in teachers’ and students’ roles

c. Thinking in different perspectives vs. Learning without focus

d. Selection of current affairs and the curriculum dominance

e. Boosting up written expression skills

f. Holding a respectful attitude towards different opinions and modes of expression

g. the need of collaborative lesson preparation and addressing diversity for effective teaching

h. Valuing learning stages rather than lesson arrangement

Our Preparations for the NSS English Language Curriculum

Five Tasks to Facilitate a Smooth Interface with the NSS English Language Curriculum

1. **Enhance students’ English abilities and create an English-rich environment in the campus**
   - Make use of a wide range of activities (e.g. English Speaking Day & English Day) and materials to provide an English-rich environment.
   - Preserve the 20-minute Morning Reading Time on Wednesdays to enhance students’ interest in reading.
   - Develop a greater variety of book report forms for S1 – S3 to prepare students for the future HKDSE School-based Assessment.
   - Enhance students’ English abilities through promoting student-teacher communication in English both inside and outside classroom.

2. **Prepare teachers for the NSS English Language curriculum**
   - Each teacher in the department will apply for various training events organized by the EDB or other organizations. They will share what they have learnt in panel meetings and informal discussions. School-based training workshops will be organized regularly as well.

3. **Select electives in the NSS curriculum and adapt materials for junior forms**
   - In 2008, teachers in the panel meeting had discussions and chose 3 – 4 NSS elective modules for future staff development and material adaptation for junior forms.

   **Our elective modules were selected with reference to the following criteria:**
   - MKP students’ background, needs, interests and abilities
   - MKP teachers’ expertise and readiness to teach the elective modules
   - Learning objectives and content of the elective modules
   - Resources available, both inside and outside school
   - Timetabling in S4 – S6
4. **Incorporate more elements of Language Arts and Non-Language Arts in the junior secondary curriculum**

- Revise the curriculum of junior forms and include more language arts and non-language arts elements.
- Develop materials of language and non-language arts for junior forms.
- Adapt the new NSS curriculum assessment criteria for the assessments of written tasks and oral activities in junior forms.
- Regularly assign reading materials including texts, journals and newspaper articles to familiarize students with different English text types.
- Teach students how to write good film reviews and book reports.
- Encourage more students to join the English Speech Festival.
- Collect and publish students’ good work of language arts / non-language arts.

5. **Implement school-based assessment in S1-S3 to prepare students for the future HKDSE**

- Students read and view English texts regularly and keep 1 journal in S1- S3 to prepare themselves for the HKDSE School-based Assessment.
- Students share what they have read or viewed in oral presentations (S1 & S3) and group discussions (S2 & S3).
- Students practise peer assessment with the evaluation forms developed by teachers in S1 – S3.
